Cotton Linters - Estimated Losses Before the Digester

Robert W. Hurter, P.Eng., MBA
President
HurterConsult Incorporated
May 2001

When properly cleaned and prepared nonwood fibre raw material enters the digester, many of the hurdles of producing pulp and paper from nonwoods have been overcome.

In many instances, however, economic problems encountered by nonwood-based pulp and paper mills are related to a lack of attention to the losses which are incurred before the digester. Losses from the field to the digester have a significant impact on the amount of the nonwood fibre raw material required and the cost of the fibre raw material per ton of pulp produced.

These losses generally can be classified as:

- transportation and storage losses
- fibre preparation losses which depend on the type of nonwood raw material being processed and the selected fibre preparation system.

Once it has been determined how much prepared raw material is needed to feed the digester, the next step is to develop a clear understanding of the transportation, storage and fiber preparation losses, all of which are critical to establishing how much nonwood fibre raw material must be harvested and delivered to the mill. Please refer to Fibre Raw Material Issues are Critical to the Success of Nonwood Pulp & Paper Mills for additional details.

The following figures provide some general rules-of-thumb concerning losses before the digester for cotton linters and the selected fiber preparation systems. The amount of loses for a given raw material can change significantly depending on the configuration of the selected fiber preparation system.
Cotton Linters (2nd cut) Requirements in bdmt / bdmt of Pulp
(Soda or Kraft Pulping)

BLEACHED PULP - for Writing & Printing Paper

Purchased Cotton Linters
1.44 bdmt → Linters
Storage
1.42 bdmt → Bale Opening,
Picking & Cleaning
1.36 bdmt → Wet
Cleaning
1.33 bdmt → Pulp
Mill
1.0 bdmt → Bleached
Pulp

Handling Losses
0.02 bdmt
Seed Hulls &
Losses
0.06 bdmt
Hull Pepper &
Losses
0.03 bdmt

BLEACHED PULP - for Dissolving Pulp

Purchased Cotton Linters
1.54 bdmt → Linters
Storage
1.52 bdmt → Bale Opening,
Picking & Cleaning
1.45 bdmt → Wet
Cleaning
1.42 bdmt → Pulp
Mill
1.0 bdmt → Bleached
Pulp

Handling Losses
0.02 bdmt
Seed Hulls &
Losses
0.07 bdmt
Hull Pepper &
Losses
0.03 bdmt

bdmt = bone dry metric tons
